

PERMIT APPLICATION: NRS 00.244

APPLICANT: Sevierville Water Systems
116 Church Street
Sevierville, Tennessee 37862

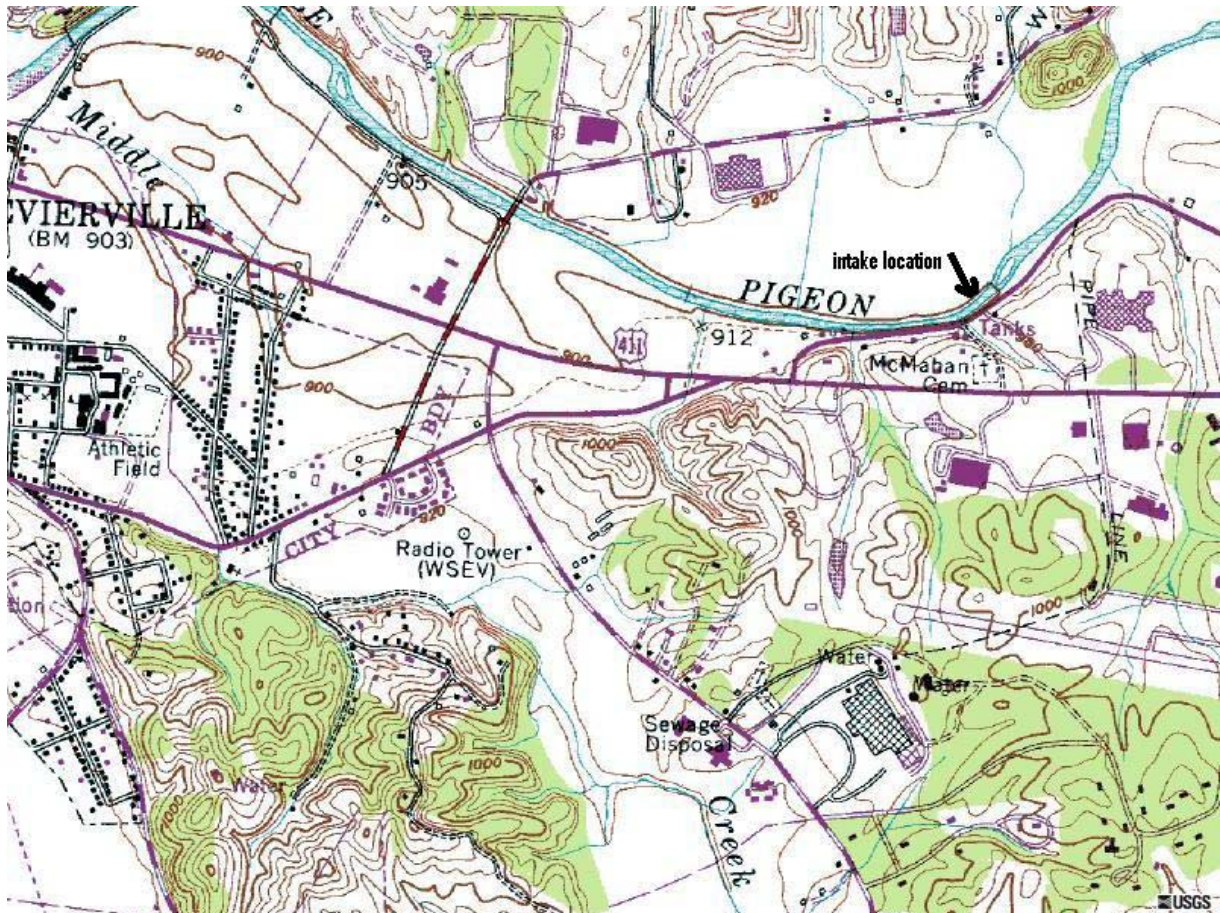

LOCATION: Little Pigeon River at river mile 7.5 (locally known as the Middle Prong), Sevierville, Sevier County, Tennessee

WATERSHED DESCRIPTION: Little Pigeon River is listed as fully supporting of its classified uses. Its statistical low flow (7Q10) is 22.8 cubic feet per second (cfs).

PROJECT DESCRIPTION: The proposed work involves the re-issuance of the permit for withdrawal of water by the Sevierville Water Plant from the Little Pigeon River. The maximum withdrawal rate would be 4.2 million gallons per day (6.49 cfs). This withdrawal for which a permit is sought is to be phased out in the next few years as Sevierville's recently constructed water treatment plant that takes water from Douglas Lake is brought into production.

PERMIT COORDINATOR: Robby Baker

USGS TOPOGRAPHIC QUADRANGLE: Pigeon Forge
